

ST. GILGEN INTERNATIONAL SCHOOL
AUSTRIA

OUR HISTORY

Education powerfully represent an orientation towards the future, a belief that through our efforts we can always improve ourselves and the world around us. Our school, located in an immensely rich historical setting, treasures a sense of history, of the host community and of our own.

Our campus contains and is surrounded by historical buildings and we look out onto a village and a lake where Neolithic hunters already left their marks thousands of years ago, where medieval pilgrims found shelter, where Mozart's family had their home. Here some of the greatest artists, musicians and Scientists gathered in the 19th Century. Our villa is named after the Bohemian Countess Marie von Ebner-Eschenbach who spent summers here before the Great War and whose writing stressed the importance of education for women.

We are confident that the school community is creating its own traditions which will complement the ones of our host community and host country, for the benefit of all.
