## SCHOOL PARK

From any place in our park one is aware of the village and nature surrounding us. Here shady corners, old trees, an apple orchard invite students to read, relax or meditate. The park leads to the lake and to many lakefront facilities. It is adjacent to the garden and house where Mozart's mother was born and his sister lived. No village in the world has so many connections to Mozart's family.

The glass fronts of our academic buildings reflect the mountains and lake and the always changing light. Education always offers new views and perspectives, our park and its buildings do the same. Awareness of the environment surrounding the school is heightened, the connections between "inside" and "outside" are strong and valued.
