

ST. GILGEN INTERNATIONAL SCHOOL
AUSTRIA

Dear Guest,

In reflecting upon the essence of **St. Gilgen International School**, a student and a member of staff had the following to share:

“We are revolutionary, dynamic, and robust. We believe in respect, courage and discipline. We wish to cultivate realistic visionaries who will create and encourage progressive change. We pride ourselves on innovative thinking and global awareness, while maintaining a lasting appreciation of small town values and traditions. We embrace the new millennium while drawing inspiration from the richness of the past.

We are conscious of our impression upon one another and as a result yearn to develop not only our minds but nurture our spirits, to become compassionate, caring individuals, prepared to honor the responsibility we hold as guardians of our planet.

We are a cultural web of eternal learners and experienced facilitators who understand the importance of working as one collaborative force to maintain and expand our strong foundation. We realize clearly that without a joint effort, our web will collapse. Therefore, we remain driven with passion, commitment, confidence and grace in hope of establishing an ever-growing world within our vast and intricate world.

We are St. Gilgen International School; fostering pioneers, developers, creators and dreamers who altogether recognize the immense value of young minds and their potential to influence, to change and to inspire.”

Yara Gomha, *Founding Student*

Carl Sandburg once said “Nothing happens unless first a dream”, we encourage students and staff to have their own.

Sincerely

Architekt Alexander Eduard Serda for the SERDA - WEINZINGER FOUNDATION
